

SECRET

NIC 9762-82

THE DIRECTOR OF CENTRAL INTELLIGENCE

WASHINGTON, D.C. 20505

National Intelligence Council

30 November 1982

MEMORANDUM FOR:

[Redacted]

25X1

Chairman, China Working Group
(Technology Transfer)

FROM

: David D. Gries
National Intelligence Officer for East Asia

SUBJECT

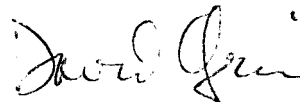

: Interagency Study Entitled China's Efforts to
Obtain Foreign Technology

1. The terms of reference for the captioned study should ensure a comprehensive, valuable result. Such research is sorely needed and could do much to inform the policy debate in Washington.

2. Unfortunately, the completion date for the final draft on 15 April will greatly reduce the usefulness of the results, since US policy on technology transfer to China must be set before Secretary Shultz makes his trip to Beijing in early February.

3. Could a means be found to provide at least preliminary findings by mid-January? This would solve the problem of supplying Secretary Shultz's party with a useful product, yet allow you time to complete the study later.

4. I would be pleased to assist you in any way you wish.

David D. Gries
